

High Service Pump Station

Investment in water and wastewater infrastructure expansion is crucial for the health of our community as well as ongoing efforts to protect our lakes, rivers, and streams.

**CHOOSE
MARSHALL**

A High Service Pump Station (HSPS) will be constructed at the Marshall Facilities Site near Michigan Avenue and 15 Mile Road adjacent to Project #2, a 4.5-million-gallon (MG) Ground Storage Tank (GST). The HSPS will house four (4) pumps each rated at 1,800 gallons per minute (gpm) with a total station capacity of 10.5 million gallons per day (MGD).

Municipal water supplied by the Battle Creek/Emmett Township Transmission Main (Project #4), the Marshall Transmission Main (Project #3), and the Verona Road Loop (Project #8) will fill the GST. The HSPS will pump water from the GST to supply the BlueOval facility and future customers in the MAJOR campus and Marshall Township.

Key Project Features

- ◆ The HSPS houses four (4) pumps each rated at 1,800 gpm.
- ◆ Total capacity of the HSPS is 10.5 MGD.
